This certificate is issued as verification that a sample(s), representative of production, was assessed and tested and found to comply with the IEC Standard list below and that the manufacturer's quality system, relating to the Ex products covered by this certificate, was assessed and found to comply with the IECEX Quality system requirements. This certificate is granted subject to the conditions as set out in IECEX Scheme Rules, IECEX 02 and Operational Documents as amended.

STANDARDS:

The apparatus and any acceptable variations to it specified in the schedule of this certificate and the identified documents, was found to comply with the following standards:

IEC 60079-0 : 2017 Explosive atmospheres - Part 0: Equipment - General requirements
Edition:7.0
IEC 60079-1 : 2014-06 Explosive atmospheres - Part 1: Equipment protection by flameproof enclosures "d"
Edition:7.0

*This Certificate **does not** indicate compliance with electrical safety and performance requirements other than those expressly included in the Standards listed above.*

TEST & ASSESSMENT REPORTS:

A sample(s) of the equipment listed has successfully met the examination and test requirements as recorded in

Test Report:

Schedule

EQUIPMENT:

Equipment and systems covered by this certificate are as follows:

General product information

MVS1110 Series equipments are mechanical vibration switches. The detailed model definition is specified in attachment.

There is a SPDT or DPDT micro switch inside this equipment, which is controlled by hand or one electromagnetic coil inside.

Each vibration switch has one flameproof compartment. The flameproof joint between cover and shell is a plane joint. The flameproof joint between reset button and copper sleeve is a cylindrical joint. The flameproof joint between range adjusting column and copper sleeve is a cylindrical joint. There is a threaded hole on the shell reserved for IECEx certified entry with flameproof threaded joint of 3/4"NPT, 1/2"NPT or M20×1.5.

The material of mechanical vibration switch enclosure is alloyed aluminium or stainless steel 316L. There is an internal earthing bolt and an external bolt on the enclosure.

Rating

See attachment.

SPECIFIC CONDITIONS OF USE: YES as shown below:

1. Rated ambient temperature is from -55°C to +70°C.
2. Contact the original manufacturer for information on the dimensions of the flameproof joints when repair.
3. When assembly, operation and maintenance, the operator should follow the requirements of IEC 60079-14:2007.
3. The entries intended to be installed in the reserved threaded hole should have IECEx certificate.
4. WARNING – DO NOT OPEN WHEN ENERGIZED.
5. CAUTION - USE FASTENER WITH YIELD STRESS \geq 640 MPa.
